To Whom It May Concern,
I am writing to offer my highest recommendation for Dzoan Nguye Tran , who served under my supervision as a DevOps and SRE Specialist at Gameloft. During his tenure, Dzoan consistently exceeded expectations in managing our cloud infrastructure, significantly contributing to the optimization of our operational costs and enhancing our system's reliability and scalability. For Gameloft a global company Dzoan was a rare employee who can speak Vietnamese, perfect French and perfect English, willing to work international hours to gain knowledge and speed up project implementations.

Dzoan possesses a rare combination of technical expertise and proactive initiative, which has been instrumental in identifying and implementing cost-saving measures within our AWS environments. His efforts to utilize AWS's cost management tools effectively resulted in substantial savings for the company, directly impacting our bottom line in a positive manner. Moreover, his s ability to anticipate potential challenges and devise preemptive solutions ensured our projects always remained on track and within budget.
One of Dzoan s standout achievements involved leading a critical project that restructured our cloud resource allocation, like Data deletion pipelines eliminating redundancies while maximizing performance efficiency. This project not only saved the company significant financial resources but also improved our service delivery, making our platforms more robust against potential disruptions.
In addition to his Multiskilled technical acumen and learner attitude , Dzoan has been the best servant of our team, consistently going beyond his line of duty to help teammates.
His dedication to collaboration and knowledge sharing significantly enhanced our team's productivity and morale. One notable accomplishment was his work to improve our data management pipeline through Python automation, which streamlined our processes and increased efficiency, showcasing his ability to leverage technology for operational excellence.

Throughout his time at Gameloft, Dzoan has demonstrated a commitment to learning and has grown to become an exceptional Cloud Architect, DevOps Engineer, SRE, and Data Engineer. His efforts have provided us with deeper insights into our data management, optimizing our infrastructure costs and efficiency further.
Despite his departure due solely to budget cuts in our organization , it is important to note that his departure is a significant loss to our team but undoubtedly a gain to any organization fortunate enough to have Dzoan skills and team servant spirit on board (and a great lad with great humor) . I am confident that Dzoan will bring the same diligence, dedication, and strategic foresight , and Can do mindset to any future roles as Dzoan did at Gameloft.
Please feel free to contact me at Darryl.pickets@gameloft.com should you require any further information or specific examples of Dzoan's contributions to our company. I am happy to discuss his qualifications and achievements in more detail.
Sincerely,
Darryl Picketts
